

Dear Customer,

Your journey with **Fluidra** is important to us. To ensure you get the **best performance** from your newly purchased pool equipment, we offer the following **complimentary services** during the full warranty period.

Fluidra After-Sales Support for Pool Equipment

Every pool is unique in shape, size, and reticulation placement, (i.e. weir, aimflow, main drain or water feature) so your pool equipment may require **fine-tuning** to operate at peak performance.

If your Pool Equipment is not performing optimally, please contact our **Customer Care team** before returning the product to the store:

- **Phone:** 086 088 7665
 - (8 to 16h30) Monday to Friday
 - (8 to 13h00) Saturday (January, February, March, September, October, November, and December)
- **Email:**
 - Coastal: customer.care@zodiac.com
 - Inland: customercare@fluidra.co.za

Our friendly, fully trained staff will assist you **over the phone** to troubleshoot and resolve the issue. If further assistance is required, we will arrange an on-site inspection by a **service technician** (within a 50 km radius of any Fluidra Pro Centre) to carry out standard adjustments and fine-tuning. **This service is offered at no cost during the warranty period.**

Call-Out Fees and Lead Times – Important Clarification

Fluidra is committed to supporting our customers and ensuring satisfaction.

- **No call-out fee** will be charged for standard setup, adjustments, or performance-related tweaks under normal usage conditions.
-  A **call-out fee of R575 (incl. VAT)** will apply when:
 - There is clear evidence of **neglect, misuse, or abuse** (e.g., poor water chemistry, suction leaks, or lack of maintenance), product not used for designed purpose.
 - The issue is **unrelated to a manufacturing defect** or normal operational adjustments.

The technician will advise on-site if any of these conditions apply **before proceeding**.

Lead times will be confirmed once the claim has been logged with our Customer Care Department, as turnaround times are dependent on capacity and parts availability.

Fluidra Warranty and Return Policy

- Fluidra warrants its products against **manufacturing defects** from the original purchase date, provided the product is purchased from an **authorized reseller**.
- This warranty does **not** cover damage due to accidents, misuse, abuse, unauthorized modifications, natural disasters or incorrect application.
- If a product failure is due to a **manufacturing defect**, Fluidra will repair or replace the affected part or product **at no charge**, including the technicians' onsite inspection (within 50 km of a Pro Centre).
- In cases outside the warranty scope, the **standard call-out fee of R575 incl. VAT** will apply.
-  **Please note:**

FLUIDRA

- Refer to the attached **warranty list** for further details, and note the specific information outlined in the **recommendations and exclusions table**.
- Used equipment is **not refundable**.

Register Your Warranty

To activate your warranty, **scan the QR code** on your newly purchased product to register it. If you choose not to register, please **retain your proof of purchase**, as it will be required for any future claims.

Here is a list of the effects that incorrect water chemistry will have on your pool equipment:

Ideal water chemistry readings:

- pH levels: Maintain between 7.2 - 7.6 in plastered pools and between 7.0 - 7.2 in fibreglass pools
- Total Alkalinity (TA) levels: Maintain between 80ppm - 120ppm for plastered pools and between 120ppm - 150ppm for fibreglass pools
- Chlorine levels: Maintain between 1.5ppm - 3.0ppm in summer and between 1.0ppm - 1.5ppm in winter

Low or high pH levels:

- The ability of chlorine to oxidize matter and kill microorganisms is directly affected by pH. As the pH rises this ability is adversely affected. In addition, at a pH over 8.0 scaling (precipitation of mineral components) and cloudy water may result.
- As pH falls below 7.0 the acidic condition will cause irritation to the eyes and mucous membranes of swimmers. Low pH (acidic water) can also corrode metal parts of a pool system and damage the plaster finish

High levels of chlorine:

- The result of excessively high chlorine is the corrosion of the filtration and cleaning equipment in your pool.

Low levels of Alkalinity:

- If your alkalinity level is too low, then your pool pH can fluctuate at the slightest addition of any acid or base product. pH can drop randomly, which causes damage to pool walls, metal, and may cause an unpleasant swimming experience.

In the event of incorrect water chemistry, Fluidra Waterlinx will not be able to honour warranty claims on pool equipment. This includes signs of corrosion; chemical build up and scaling.

FLUIDRA

Below are a few examples of damage caused due to incorrect water chemistry:

Sticky flexi foot and disc on a pool cleaner

Corroded pump parts

Corroded and rusted shaft seal for a pump

Chemical build up on a pump

*Recommendation and Exclusion Table

All Fluidra Products are covered by a Manufacturing Defects Warranty. Fluidra Products are covered for use in their specified application only.

Exclusions that apply to all product: Wear and tear, neglect and misuse, poor water chemistry, modifications & external factors.

Pumps: 3yr warranty. **Years 1 and 2** include on-site support, and **Year 3** is a carry-in warranty, requiring the pump to be taken to a Fluidra Pro Centre for repairs.

Pool Cleaners - Mechanical: Wear and tear parts 1 year only (Tracks, Engine, Body top swivel).

Pool Cleaners - Robotic: Wear and tear parts 1 year only (Gears, Cable, Tracks).

Hose: Scuffing is not covered.

Diaphragms: Only tears of the seams and scuffing on the collar is covered.

Heat Pumps: Must be installed according to SANS10142 and with ball valve bypass connection.

Solar Panels: No warranty on panel if pierced with sharp object, scuffing or external damage.

Lighting: NO warranty if light is not used with a watertight cable joint.

Pool Electrical: Must be installed according to SANS10142.

Electrodes Pro-rata: - Sliding scale after 1 year warranty - pro-rata details below

• First Period 13 – 18 months **Ei series** 40% of RRP
• Second Period 19 – 24 months **Ei series** 80% of RRP

Pro-rata pricing applies to in-warranty replacements.
Out-of-warranty or spare electrodes include a full 3-year pro-rata warranty.

• First Period 13 – 18 months **eXO series** 20% of RRP
• Second Period 19 – 24 months **eXO series** 40% of RRP
• Third period 25 – 30 months **eXO series** 60% of RRP
• Fourth period 31 – 36 months **eXO series** 80% of RRP

Pro-rata pricing applies to in-warranty replacements.
Out-of-warranty or spare electrodes include a full 3-year pro-rata warranty.
